<b>Hopper Capacity:</b>	12000 coins
<b>Coin Diameters</b>	14 - 34mm
<b>Coin Thickness</b>	0.7 - 3.9mm
<b>Dimensions:</b>	240(L) x 270(W) x 235(H) mm
<b>Weight</b>	11kg
<b>Power Consumption:</b>	70W

The TG150 Coin Bagger is a compact and portable high speed bagger of single denominations coins and tokens.

It processes pre-sorted coins into bank bags rejecting foreign and wrong denomination coins. It can continuously count or count to a pre-set number i.e. 20x £1 to fill a bank bag.

The double knob adjustment offers highest operator convenience. Coins that are smaller by at least 0.5 mm than the preset denominations are sorted automatically.

The machine also stops operation automatically after coin feeding.

Pre-programmable quantity stops and a memory that allows storage of counted coins are additional advantages.
