

## TG510 Coin Counter and Sorter

The **TG510** coin counting and sorting machines/coin sorting machines are especially designed for applications at small and medium-sized banks, supermarkets, department stores, vending machine operators, amusement arcades or any other establishments where a high volume of coins are handled.

The TG510 coin sorter counts, detects and sorts coins. It also shows the quantity, total value of each denomination of coins as well as rejecting foreign coins and can save and print data. The machine offers a non-stop sorting facility that reduces waiting time and equipped with a batch level indicator which is unique on coin sorting machines. The unit is equipped with an internal printer and offers PC connection for updates and data transfer.
